

Expedite Renewable Energy

assess **strategize** **implement**

*Your one-stop-shop to **assess** current electricity usage, **strategize** a plan for on-site renewable energy production and **implement** your project from start to finish.*

Services are providing in three phases, each one with its own services contract.

PHASE I: assess & strategize

• Initial Consultation:

- Gain an understanding of the goals for the company and energy usage
- Discuss potential wind and/or solar renewable energy project(s)
- Tour facility and meet with maintenance supervisor and other applicable staff

• Provide Assessment/Feasibility Report, that includes:

- Assessment of current electricity usage by reviewing past 12 months of electricity bills
- Recommendations for renewable energy generation wind and/or solar projects
- Provide necessary wind study and/or solar radiation report
- Evaluate energy production for specific wind turbine(s) and/or solar panel(s) at your specific site
- Provide overall project costs for your specific project
- Provide complete return on investment report for proposed project
- Provide a list of incentives available for your specific project, including grants, tax credits, accelerated depreciation and low-interest loans
- Initial findings on zoning and other regulatory agencies for your specific project
- Provide overview of Ohio's energy bill (SB221), renewable energy credits, net metering and carbon credits.
- Evaluate options for energy audit and/or energy efficiency projects
- Recommendations for next steps and time line

PHASE II:

- Apply for all applicable grants and secure financing/low interest loans from banking institutions
- Soil test for wind/roof analysis for solar
- Applicable engineering reports and drawings completed
- Secure zoning/height variance for specific project
- Solidify all vendors working on the project and negotiate contract for services rendered

PHASE III: implement

- Apply for all necessary permits for project
- Purchase equipment and begin construction for project from start to finish
- Apply for net metering with utility and negotiate contract
- Commission project
- Apply with the PUCO to sell renewable energy credits
- Finalize maintenance plan
- Media/marketing to get wide-spread attention for your project(s)
